

Cooperation of WINTER abrasive cutters with LATZKE from 01.03.2019

In the sales area Germany, Austria, Switzerland, Netherlands, Belgium, Luxembourg, Principality of Liechtenstein, Denmark the product range of the proven Cuto20, Cuto35 and WetCut55 abrasive cutters from WINTER is represented exclusively by LATZKE.

LATZKE Härteprüfung GmbH, based in Wiehl, North Rhine-Westphalia, is a proven specialist in the field of hardness testing and metallography. Founded in 1995, the company grew into a full-service partner for the core business of hardness testing and now has a DAkkS-accredited calibration laboratory for ISO & ASTM calibrations in addition to its extensive range of services. The product range is rounded off by general overhauls of hardness testing and metallography equipment, consumables such as hardness reference plates, indenters and metallography products as well as repairs and spare parts for many instruments from a wide range of manufacturers. Latzke Härteprüfung GmbH is part of the Zwick-Roell Group and is represented by the two managing directors Sascha Latzke and Andreas Seifert.

WINTER has been active in special machinery and plant construction since 1946. WINTER has been developing, manufacturing and supplying wet cutting machines for metallography for more than 40 years. WINTER is represented by the three managing directors Stefan Winter, Thomas Winter and Dr. Markus Osterloh. Not only both companies benefit from the cooperation, but also the customers, who can fall back on extensive know-how and an efficient service structure through the cooperation.
